Initial distance : 2740.491933969449
Initial stress: 5224.8
Initial objective: 5224.8
Final objective: 2703.3999999999996
Final distance : 2449.3737959483155
Final stress: 2703.3999999999996

A scatter plot showing the relationship between 'Distance' (x-axis) and an unlabeled variable (y-axis). The x-axis ranges from 2200 to 2700 with major ticks every 100 units. The y-axis ranges from 0 to 100 with major ticks every 10 units. The data points are black circles, showing a general upward trend with significant scatter. There are several points at the top of the plot, around y=90-100, and many points clustered between y=40 and y=70.
